17 July 1956

Bearr Ed,

During Lee's last visit to your place on 12 July 1956 one of the subjects discussed was editing. It has been stated that in almost all cases there have been varying lengths of film at either end of the rolls of film which have no information of intelligence value. You, [REDACTED] suggested it would be well to cut off these portions. All of you were in agreement in one, cutting would stop at first indication of probable target information and would be done in a manner which would be noncursive to matching verticals with the obliques and second, no frames would be eliminated from any other portion of the roll regardless of extent of cloud coverage.

25X1A9a

Our Operations and Cliff are in accord therefore you can proceed to accomplish the editing as outlined in paragraph 1 above.
